CSC 240 Discrete Math for Computing - Syllabus

Bay State Community College
Credits: 4
Instructor: Course staff Office hours: by appointment

Course Description
Discrete mathematics for computing: logic, proof techniques, counting and graphs.

Learning Outcomes
- Construct proofs by induction
- solve counting problems
- model problems with graphs

Topics Covered
- Propositional and predicate logic
- Proof techniques and induction
- Sets, relations and functions
- Counting and combinatorics
- Graphs and trees

Weekly Schedule
Week 1-3: Propositional and predicate logic
Week 4-6: Proof techniques and induction
Week 7-9: Sets, relations and functions
Week 10-12: Counting and combinatorics
Week 13-15: Graphs and trees

Grading Policy
Assignments 30%, midterm exam 30%, final exam 40%. Prerequisites: as listed in the catalogue. Academic integrity policy applies.
